Aleksandr Dugin's Foundations of Geopolitics: A Deep Dive -

I. Unveiling Dugin's Eurasianist Vision A. Dugin's Life and Intellectual Trajectory: From Marxism to Eurasianism. Aleksandr Dugin's intellectual journey is a fascinating tapestry woven from disparate threads. Initially attracted to Marxist-Leninist ideology, he later underwent a profound metamorphosis, embracing a vehemently anti-liberal, pan-Eurasian worldview. This ideological shift is crucial to understanding the genesis of his influential, albeit controversial, work, "Foundations of Geopolitics." B. The Context of "Foundations of Geopolitics": Post-Soviet Russia and Global Power Dynamics. Published in 1997, "Foundations of Geopolitics" emerged from the turbulent aftermath of the Soviet Union's collapse. Russia, grappling with its newfound identity and diminished global standing, sought to redefine its place in a rapidly changing world order. Dugin's work provided a potent framework for navigating this geopolitical maelstrom. C. Key Themes and Arguments: A Precursor to Modern Geopolitical Strategy. Central to Dugin's thesis is a scathing critique of Western liberalism, which he views as inherently expansionist and morally bankrupt. He advocates for a multipolar world order centered around a powerful, resurgent Eurasia, with Russia at its helm. This vision has resonated with certain circles,

shaping the discourse on global power dynamics. *II. The Critique of Liberalism and the West* A. Dugin's

Deconstruction of Western Liberal Hegemony: A Multipolar World Order. Dugin sees Western liberalism not as a benign ideology, but as a pernicious force actively seeking global dominance. This hegemonic drive, he argues, necessitates the creation of a countervailing power structure – a multipolar world order where diverse civilizations and geopolitical entities coexist on more equitable terms. B. The "Atlanticism" Paradigm: A Critique of US Global Dominance. Dugin specifically targets "Atlanticism," the perceived alliance between the United States and its Western European allies, as the primary instrument of this hegemonic project. He labels this as a pernicious influence, actively undermining traditional values and sovereignty globally. C. The West as a Decadent Force: A Philosophical and Moral Critique. Beyond geopolitical considerations, Dugin levels a profound philosophical and moral critique against the West. He paints a picture of societal decay, moral relativism, and spiritual emptiness, contrasting this with the purported traditional values and spiritual vitality of Eurasia. **III. The Eurasianist Paradigm: A Multipolar World Order**

A. Eurasianism as a Counterpoint to Liberal Internationalism: Redefining Geopolitical Space. Eurasianism, the core of Dugin's geopolitical philosophy, offers a radical alternative to liberal internationalism. It

transcends conventional nation-state boundaries, emphasizing a shared cultural identity and historical destiny for the vast Eurasian landmass. B. The Heartlands and Rimlands: Mackinder's Influence and Dugin's Adaptation. Dugin draws heavily on Halford Mackinder's heartland theory, adapting it to his Eurasianist vision. He posits Eurasia as the global geopolitical heartland, a pivotal region whose control is paramount to global power. C. The Role of Russia as the Eurasian Heartland: Geopolitical Pivot and Cultural Hub. Russia, in Dugin's schema, occupies a central role as the pivotal state within this Eurasian heartland, acting as both a geopolitical pivot and a cultural hub, uniting disparate peoples under a shared Eurasian identity. D. The Concept of "Greater Space": A Rejection of National Borders in Favor of Cultural Identity. Dugin's concept of "Greater Space" transcends traditional geopolitical boundaries, advocating for a pan-Eurasian identity that eclipses national affiliations. This vision prioritizes cultural unity and shared destiny over rigidly defined national borders. (IV-VI)

Aleksandr Dugin's Foundations of Geopolitics: A Controversial Blueprint for Global Power

The world of international relations is a complex tapestry woven with intricate threads of history, ideology, and power dynamics. At the heart of many contemporary geopolitical debates, particularly concerning Russia's role on the global stage, lies the provocative and often misunderstood figure of Aleksandr Dugin and his seminal work, "Foundations of Geopolitics: The Geopolitical Future of Russia." This book, first published in 1997, has been described as everything from a manifesto for a resurgent Russia to a fringe extremist text. Regardless of your perspective, understanding its core tenets is crucial for anyone seeking to grasp the intellectual underpinnings of certain Russian foreign policy viewpoints. In this comprehensive exploration, we'll delve into the foundational ideas presented in Dugin's "Foundations of Geopolitics," examining its key arguments, its historical

context, and its enduring, albeit controversial, influence. We will explore the core concepts Dugin champions, such as the clash between land powers and sea powers, his vision for a multi-polar world order, and his specific geopolitical prescriptions for Russia. We'll also touch upon the criticisms and controversies surrounding his work, acknowledging its divisive nature while striving for a balanced and informative overview.

The Core Tenets: Land vs. Sea, Tradition vs. Modernity

At its most fundamental level, "Foundations of Geopolitics" is built upon a dichotomy that Dugin sees as shaping the entire course of human history: the eternal struggle between **land powers** and **sea powers**.

The Land Power: The Eurasian Heart

Dugin posits that **land powers**, characterized by their continental reach, traditional values, and collective identity, represent the natural antithesis to **sea powers**. These powers, he argues, are rooted in the earth, emphasizing community, spirituality, and a strong sense of history. Russia, in Dugin's view, is the quintessential land power, possessing the vast geographical expanse and the cultural heritage to embody this archetypal force. He often draws

upon the legacy of thinkers like Karl Haushofer, a prominent German geopolitician, who also emphasized the strategic importance of continental heartlands. The concept of "Eurasia" is central to Dugin's philosophy. He envisions Russia not as a purely European or Asian nation, but as a unique **Eurasian civilization** that bridges the two continents. This Eurasian identity, for Dugin, is characterized by a deep historical consciousness, a rejection of Western liberalism, and a commitment to traditional values. He sees this as a distinct civilizational model, a **civilizational state** poised to challenge the perceived hegemony of the Atlanticist powers.

The Sea Power: The Atlanticist Hegemon

In stark contrast, **sea powers**, exemplified by powers like Great Britain and later the United States, are seen as embodying the principles of individualism, liberalism, economic expansion, and global dominance. Dugin views these powers as inherently restless, seeking to project their influence across the oceans and impose their ideological and economic systems on others. This is often framed as a conflict between **Atlanticism** and **Eurasianism**, a clash between a globalizing, liberal order and a more traditional, multi-polar world. Dugin's critique of the West is multifaceted. He argues that Western modernity, with its emphasis on materialism, secularism, and individual rights,

has led to spiritual decay and the erosion of traditional social structures. He sees the United States, in particular, as the ultimate embodiment of this hegemonic sea power, actively seeking to spread its influence and undermine any potential rivals. The ****end of history**** narrative, popularized by Francis Fukuyama, is something Dugin vehemently rejects. Instead, he believes we are entering a new era of geopolitical struggle, a ****post-Western world**** order.

The Strategic Importance of the Heartland

Drawing inspiration from figures like Halford Mackinder, who identified the "pivot area" or "heartland" as the key to global domination, Dugin emphasizes the strategic significance of Russia's vast continental territory. He argues that whoever controls the Eurasian heartland controls the world island, and consequently, the world. This concept fuels his conviction that Russia has a unique historical destiny to assert its dominance over this critical geopolitical space. The ****geopolitical future of Russia**** is intrinsically linked, in his mind, to its ability to harness the power of its vast landmass.

Geopolitical Prescriptions: Dividing and Conquering "Foundations of

Geopolitics" is not merely a theoretical treatise; it is also a prescriptive guide, outlining specific strategies for Russia to achieve its geopolitical ambitions. These prescriptions are often the most controversial aspects of Dugin's work.

The Dismantling of the United States

One of the most striking and unsettling recommendations in the book is Dugin's call for the strategic dismantling of the United States. He advocates for sowing internal discord within American society, exacerbating existing ethnic and

social tensions, and encouraging secessionist movements in various regions. The goal, as he outlines it, is to weaken and ultimately fragment the United States, thereby removing a primary obstacle to Russia's Eurasian ambitions. This radical proposition has led many to label his work as extremist.

The Reconfiguration of Europe

Dugin envisions a Europe that is not dominated by *Atlanticist*** influence but is instead drawn into the Russian orbit. He suggests fostering anti-American sentiment within European nations, promoting a pan-European**

identity that is distinct from American influence, and actively encouraging geopolitical instability on the continent. The idea is to create a continental bloc, under Russian leadership, that can counter the power of the United States and its allies. This involves, in his view, exploiting existing nationalisms and historical grievances.

The Fate of Neighboring States

The book also outlines specific geopolitical strategies for Russia's immediate neighbors. Dugin argues for the reincorporation of certain territories into a Russian sphere of

influence. He discusses the potential for Russia to exert control over Ukraine, suggesting its artificiality as a state and advocating for its partition. Similarly, he outlines strategies for influencing the Caucasus and Central Asia, viewing these regions as vital to Russia's Eurasian project. This aspect of his work is particularly alarming for countries bordering Russia, as it suggests a willingness to interfere in their internal affairs and territorial integrity.

**The Role of Ideology and Culture
Beyond military and political**

strategies, Dugin emphasizes the crucial role of ideology and culture in shaping geopolitical outcomes. He champions a return to traditional values, a rejection of Western liberalism, and the promotion of a distinct **Eurasian ideology****. This involves fostering a sense of shared identity and destiny among the peoples of Eurasia, creating a spiritual and cultural bulwark against Western influence. He sees this as a battle for the soul of nations, a struggle for the future of civilization itself.**

Historical Context and Intellectual Influences To understand

"Foundations of Geopolitics," it's important to consider its historical and intellectual backdrop. The book emerged in the turbulent aftermath of the Soviet Union's collapse, a period of profound national humiliation and identity crisis for Russia.

The Legacy of Russian Nationalism and Imperialism

Dugin's work taps into a long tradition of Russian **nationalism and imperial thought. Thinkers like Nikolai Danilevsky, who proposed a distinct civilizational model for Russia, and Konstantin Leontiev, with**

his emphasis on traditionalism and conservatism, are significant influences. Dugin can be seen as a contemporary inheritor of these ideas, seeking to revive a sense of Russian exceptionalism and its historical role as a great power. The echoes of the Russian Empire and its ambitions are palpable.

Geopolitics as a Discipline

The very discipline of **geopolitics**** itself, which rose to prominence in the late 19th and early 20th centuries, provides a framework for Dugin's thinking. Figures like Mackinder, Haushofer, and Mahan,**

who analyzed the relationship between geography, power, and strategy, are frequently referenced. Dugin adapts these classical geopolitical theories to his contemporary context, applying them to the specific challenges and opportunities facing Russia.

The Rise of Fourth Political Theory

Dugin is also known for developing his own distinct philosophical concept, the *Fourth Political Theory***. This theory seeks to transcend the traditional political ideologies of liberalism, communism, and fascism, offering a new**

framework for understanding and organizing society. While the Fourth Political Theory is a broader philosophical project, its ideas about traditionalism, anti-globalism, and a rejection of Western modernity significantly inform "Foundations of Geopolitics."

Criticisms and Controversies: A Divisive Figure It is impossible to discuss Aleksandr Dugin and "Foundations of Geopolitics" without acknowledging the significant criticism and controversy surrounding his work.

Extremism and Anti-Semitism

Critics often point to the overtly **extremist**** nature of Dugin's prescriptions, particularly his calls for the dissolution of the United States and his apparent endorsement of aggressive geopolitical expansion. Furthermore, concerns have been raised about elements of ****anti-Semitism**** and racist rhetoric present in some of his writings, though the extent and interpretation of these are debated.**

Influence and Deniability

The precise level of Dugin's influence on actual Russian foreign policy is a subject of ongoing debate. While

some analysts argue that his ideas have had a significant impact, shaping the thinking of certain political elites, others view him as a fringe intellectual whose pronouncements are amplified by media attention. The Russian government often maintains a degree of plausible deniability regarding Dugin's more extreme views. However, the repeated articulation of themes present in his work by Russian officials cannot be ignored.

The Danger of Determinism

A common criticism of geopolitical thought, including Dugin's, is its

tendency towards geographical determinism - the idea that geography dictates destiny. Critics argue that such approaches oversimplify complex human affairs and can lead to aggressive, nationalistic policies. Dugin's work, with its emphasis on immutable geographical realities and civilizational clashes, falls into this category for many.

Conclusion: A Provocative Vision for a Shifting World Order Aleksandr Dugin's "Foundations of Geopolitics" remains a potent and provocative text that continues to spark debate and influence discussions about

Russia's place in the world. While its more extreme recommendations are widely condemned, its core ideas about the clash between land and sea powers, the importance of traditional values, and the vision of a multi-polar world resonate with certain strands of Russian thought and have, in various ways, found echoes in contemporary geopolitical discourse. Understanding Dugin's work is not about endorsing his views; it is about recognizing the intellectual currents that can shape foreign policy and national identity. In an era of increasing geopolitical flux and questioning of the existing world

order, the ideas presented in "Foundations of Geopolitics" offer a glimpse into a complex and, for some, compelling vision for the future. Whether one agrees or disagrees with his **geopolitical future of Russia, Dugin's legacy as a provocative thinker who has undeniably left his mark on the landscape of **geopolitics** is undeniable. His theories continue to be dissected, debated, and, in some corners, quietly embraced, making "Foundations of Geopolitics" a vital, albeit controversial, text for anyone seeking to understand the intricate dynamics of global power. The Foundations of Geopolitics in Aleksandr Dugin's Framework

Aleksandr Dugin, a prominent Russian political philosopher and geopolitical theorist, has profoundly shaped contemporary understanding of geopolitics through his foundational work on the principles governing space, power, and cultural identity. His approach transcends conventional geopolitical discourse by integrating philosophy, history, and cultural theory into a cohesive framework that explains how spatial dynamics influence political strategies and national destinies.

The Philosophical Underpinnings of Geopolitical Space

At the core of Dugin's geopolitical thought lies a deep philosophical engagement with the nature of space—not merely as physical territory, but as a living, contested domain shaped by historical memory, cultural identity, and spiritual essence. Drawing on metaphysical traditions, Dugin views geopolitics as an arena where civilizations assert their presence and survival through the control and symbolism of space. He argues that geopolitical struggles are fundamentally about the preservation of a nation's unique cultural and ancestral identity against homogenizing global forces. This perspective challenges purely realist or economic interpretations of geopolitics by emphasizing the existential and cultural dimensions of territorial claims.

Key Insights: Civilization, Identity, and the Geopolitical Axes

One of Dugin's central insights is the role of civilization as a primary driver of geopolitical behavior. He identifies distinct civilizational blocs—such as Slavic, Christian, Islamic, and Oriental—each with its own historical trajectory, values, and spatial orientation. This civilizational lens allows for a deeper analysis of geopolitical alignments and conflicts, framing them not as arbitrary power games but as expressions of

civilizational survival and identity. Dugin further develops the concept of geopolitical axes—historical vectors that define the spatial logic of power competition. These axes reflect not only military and economic corridors but also cultural fault lines and symbolic boundaries that shape political alliances and rivalries.

Applications in Modern Geopolitical Strategy

Dugin's theories find practical resonance in the strategic postures of various nations, particularly within the Eurasian geopolitical space. His emphasis on cultural authenticity and resistance to Western liberal hegemony has influenced policymakers and strategists seeking to redefine national sovereignty and regional influence. For instance, his advocacy for a "sovereign democracy" rooted in traditional values and territorial integrity offers a conceptual foundation for states resisting external political or economic encroachment. Moreover, his framework aids in interpreting contemporary conflicts—such as the contest over Eastern Europe or Central Asia—where identity, historical narrative, and cultural continuity play decisive roles alongside material interests.

Benefits of Dugin's Geopolitical Paradigm

The appeal of Dugin's approach lies in its ability to provide a holistic understanding of geopolitical phenomena. By integrating philosophical depth with strategic realism, it enables analysts and decision-makers to see beyond immediate tactical moves and grasp the deeper cultural and historical roots of political behavior. This comprehensive perspective fosters more nuanced policy formulation, encouraging long-term vision over short-term expediency. Furthermore, Dugin's focus on identity and civilization offers a powerful narrative tool for nations and movements seeking to legitimize their geopolitical ambitions through cultural continuity and historical destiny.

Future Outlook: Relevance in a Multipolar World

As global power structures shift toward a more multipolar order, Dugin's foundations of geopolitics are increasingly relevant. His framework anticipates the growing friction between homogenizing global institutions and resurgent civilizational identities, offering insights crucial for navigating future geopolitical tensions. In an era marked by cultural backlash, nationalist resurgence, and strategic competition over influence zones, Dugin's work underscores the enduring importance of space, identity, and historical

consciousness in shaping global affairs. His legacy endures as a vital resource for scholars, strategists, and policymakers seeking to understand and engage with the complex interplay of culture, power, and territory in the 21st century.

Aleksandr Dugin's "Foundations of Geopolitics": A Controversial Blueprint for a Multipolar World

Aleksandr Dugin's "Foundations of Geopolitics: The Geopolitical Future of Russia" (1997) stands as a seminal, albeit deeply controversial, text that has significantly influenced Russian foreign policy thinking and shaped discussions about global order. More than just a geopolitical treatise, it's a radical reimagining of Russia's role in the world, a rejection of Western liberal democracy, and a call for a multipolar international system. This article will delve into the core tenets of Dugin's work, analyze its key arguments, and explore its enduring, and often troubling, impact on contemporary geopolitics and international relations.

The Genesis of a Vision: Post-Soviet Russia and the Search for Identity

Published in the turbulent aftermath of the Soviet Union's collapse, "Foundations of Geopolitics" emerged from a period of profound national introspection and existential crisis for Russia. The perceived humiliation of the Soviet defeat, the dissolution of its empire, and the rapid embrace of Western economic and political models left many Russian intellectuals searching for a new national identity and a redefined place on the world stage. Dugin, a prominent figure in Russian nationalist and neo-Eurasianist circles, articulated a vision that resonated with those disillusioned by the West and yearning for a resurgence of Russian power and influence.

The book was not merely an academic exercise. It was widely circulated, even reportedly distributed to military academies and government officials, suggesting a deliberate effort to propagate its ideas within the corridors of power. This accessibility and reach underscore its ambition to serve as a practical guide for shaping Russia's foreign policy and its strategic objectives in the nascent unipolar world order dominated by the United States.

Core Tenets of Dugin's Geopolitical Philosophy

At its heart, "Foundations of Geopolitics" presents a stark dichotomy between two fundamental civilizational forces: the Atlanticist powers, represented primarily by the United States and its allies, and the Eurasian landmass, where Russia is positioned as the natural leader and consolidator. Dugin labels the former as a "thalassocracy" – a sea-based power characterized by individualism, liberalism, globalism, and a nomadic, outward-looking expansionism. The latter, conversely, is a "tellurocracy" – a land-based civilization defined by collectivism, tradition, spirituality, and a static, inward-focused stability.

The Atlanticist Threat and the "Global Satanism"

Dugin views the Atlanticist bloc, particularly the United States, as an inherently expansionist and destabilizing force. He argues that their relentless pursuit of global dominance through the spread of liberal democracy, free markets, and "ideological subversion" poses an existential threat to traditional societies and the very concept of national sovereignty. This "American Project," as he terms it, is seen as a form of "global Satanism," seeking to undermine and destroy all opposing value systems and cultural identities. The expansion of NATO eastward, a key concern for Russia,

is interpreted by Dugin as a direct manifestation of this Atlanticist aggression, aiming to encircle and weaken Russia.

The Eurasian Heartland and Russia's Destiny

In stark contrast, Dugin champions the Eurasian continent as the natural sphere of Russian influence. He posits that Russia, by virtue of its geographical position and historical trajectory, is destined to lead a unified Eurasian empire. This empire would be a bulwark against Western influence, a protector of traditional values, and a force for rebalancing global power. The concept of Eurasia is not merely geographical; it is also deeply ideological, emphasizing a unique civilizational path distinct from the West.

Dugin envisions this Eurasian empire as a "multipolar" world, where different civilizations and spheres of influence coexist, rather than a unipolar world dominated by a single hegemonic power. This vision directly challenges the post-Cold War unipolar moment and the perceived American attempt to establish a global hegemony.

Strategic Imperatives for Russian Geopolitics

"Foundations of Geopolitics" outlines a series of ambitious and often aggressive strategic imperatives for Russia to achieve its Eurasian ambitions. These include:

The Partition of Europe and the Creation of Spheres of Influence

Perhaps the most controversial aspect of Dugin's work is his advocacy for the strategic weakening and partitioning of Europe. He suggests that Russia should actively work to undermine the European Union from within, encouraging secessionist movements and fostering internal divisions. His proposed "Great Eurasian Partnership" would involve dividing Europe into distinct spheres of influence, with Eastern Europe, including much of the Balkans and former Soviet republics, falling under Moscow's direct control. The fragmentation of European unity is seen as essential to prevent the formation of a cohesive Western bloc capable of challenging Russian interests.

Destabilization of the United States and its Allies

Dugin advocates for covert and overt measures to destabilize the United States and its key allies. This includes promoting internal dissent, exploiting social and political fault lines, and even advocating for the use of strategic disinformation and psychological warfare. The aim is to weaken the cohesion and resolve of the Atlanticist powers, thereby creating opportunities for Russia to expand its influence and consolidate its Eurasian bloc.

The Importance of Strategic Alliances and "Eurasian" Partners

While the United States is presented as the primary adversary, Dugin also recognizes the need for strategic alliances to counter Western hegemony. He identifies potential partners within Eurasia, including Turkey, Iran, and even a fragmented China, as crucial elements in building a counter-hegemonic bloc. These alliances are envisioned not as partnerships of equals but as strategic alignments serving Russia's overarching geopolitical goals. The concept of a "Great Game" in Central Asia and the Middle East takes on a new, more assertive dimension in Dugin's framework.

The Role of Ideology and "Conservative Revolution"

Dugin's geopolitical vision is inextricably linked to a profound ideological critique of Western liberalism. He calls for a "conservative revolution" within Russia and globally, one that rejects secularism, individualism, and globalism in favor of traditional values, spirituality, and strong national identities. This ideological struggle is considered as important as military and economic power in the grand geopolitical contest. He actively promotes neo-Eurasianism as a counter-ideology to Western liberalism, aiming to provide an alternative worldview and a unifying narrative for his proposed Eurasian bloc.

Critiques and Controversies Surrounding "Foundations of Geopolitics"

"Foundations of Geopolitics" has been met with widespread condemnation and has been labeled as neo-fascist, imperialist, and even dangerous by many scholars and commentators. Critics point to its apparent endorsement of territorial expansion, its dismissal of democratic principles, and its often inflammatory rhetoric.

Imperialist Ambitions and Neo-Colonialism

The most significant criticism leveled against Dugin's work is its apparent endorsement of Russian imperialism and a desire to reassert control over former Soviet territories. Critics argue that his vision of a Eurasian empire mirrors the authoritarianism and expansionism of historical Russian empires, raising concerns about national sovereignty and self-determination for the nations within Russia's proposed sphere of influence. The emphasis on a land-based empire and the subjugation of smaller nations is often seen as inherently neo-colonial.

Anti-Westernism and Xenophobia

Dugin's relentless critique of the West and his portrayal of it as a monolithic, malevolent force have been criticized for bordering on xenophobia and promoting a deeply divisive

worldview. His rhetoric often demonizes Western values and institutions, fueling anti-Western sentiment and hindering constructive dialogue and cooperation on the international stage. The "us vs. them" mentality permeates his analysis, leaving little room for nuanced understanding or common ground.

The Influence on Russian Foreign Policy

While Dugin's direct influence on day-to-day policymaking is debated, the fact that "Foundations of Geopolitics" has been studied in military academies and has been openly discussed by prominent figures in Russian political and intellectual circles cannot be ignored. Some analysts argue that his ideas have seeped into the broader discourse of Russian foreign policy, contributing to a more assertive and confrontational stance towards the West. The annexation of Crimea and the ongoing conflict in Ukraine are seen by some as reflecting the strategic impulses outlined in his book, particularly the desire to reclaim territories considered historically Russian and to push back against perceived Western encroachment.

The Enduring Relevance of Dugin's Ideas in a Shifting World Order

Despite the controversy, "Foundations of Geopolitics"

remains a significant text for understanding contemporary geopolitical dynamics. Its enduring relevance lies in its prescient diagnosis of certain anxieties within Russia and its articulation of an alternative vision to the liberal international order. In an era of rising nationalism, challenges to globalization, and growing multipolar tendencies, Dugin's ideas, however extreme, continue to resonate with those who feel marginalized by the current global system.

The book's emphasis on the clash of civilizations, the importance of identity politics, and the struggle for spheres of influence are themes that continue to shape international relations. While Western policymakers and analysts may recoil from Dugin's overt calls for destabilization and territorial expansion, understanding the logic and appeal of his arguments is crucial for navigating the complexities of the 21st-century geopolitical landscape. His framework offers a stark and provocative counterpoint to prevailing Western narratives about democracy, human rights, and international law, forcing a confrontation with alternative perspectives on global order and Russia's place within it.

In conclusion, Aleksandr Dugin's "Foundations of Geopolitics" is not merely a theoretical text; it is a bold, albeit disturbing, blueprint for a radically different world order. Its influence, whether direct or indirect, on Russian strategic thinking and its contribution to the broader

discourse on multipolarity and civilizational conflict demand serious analytical engagement. While its ultimate aims are deeply contested and its methods often abhorrent, the book serves as a stark reminder of the enduring power of ideology in shaping geopolitical ambitions and the persistent challenges to the established global order.
