Extinct and Endangered Animals for Kids

I. A World of Wonders, Lost and at Risk A. What does "extinct" mean? Extinct means that not a single member of a species is left alive anywhere on Earth. They're gone forever. Imagine a world without giraffes – that's what extinction means for an entire species. B. What does "endangered" mean? Endangered means a species is at serious risk of becoming extinct. Their numbers are very low, and they might disappear if we don't help them. Think of it as a species on a very, very precarious tightrope. They're hanging on, but it could all end quickly. C. Why should kids care about extinct and endangered animals? We share this planet with incredible creatures, and losing them makes the world a much sadder place. Plus, it's our responsibility to protect the amazing biodiversity of the planet. Everything is interconnected; animals and their habitats need to prosper for our own well-being. **II. Famous Extinct Animals** A.

Dinosaurs: Millions of years ago, Earth was dominated by colossal dinosaurs! From the towering Brachiosaurus to the ferocious Tyrannosaurus Rex, these creatures were truly magnificent. Their sudden demise, through an asteroid impact, caused the extinction of countless species. B. The Dodo Bird: This flightless bird, endemic to Mauritius, was sadly hunted to extinction within a few centuries of human arrival. Its inability to fly and its trusting nature made them easy targets for hunters. A poignant parable of human impact. C. The Passenger Pigeon: Once numbering in the billions, the passenger pigeon was a common sight in North America. Overhunting and habitat destruction led to its complete extinction by the early 20th century; An astonishing fall from grace. D. The Tasmanian Tiger (Thylacine): This fascinating marsupial, resembling a dog with stripes, roamed Tasmania until the early 20th century. Human hunting and habitat loss spelled its doom. A chilling reminder of our power to wipe out species. **III. Currently Endangered**

Animals A. The Amur Leopard: This elusive and beautiful cat, with its stunning spotted coat, is critically endangered, with only a few hundred left in the wild. Habitat loss and poaching severely threaten this magnificent species. B. The Giant Panda: These iconic bamboo-munching bears are under constant threat from habitat loss due to deforestation. Despite intensive conservation efforts, they remain a vulnerable species. C. The African Elephant: Poaching for ivory and habitat loss significantly impact their population. These intelligent and social creatures face an uncertain future. D. The Orangutan: These intelligent apes call the rainforests of Borneo and Sumatra home.

Deforestation for palm oil plantations is devastating their habitats, leading to drastic population declines. E. The Snow Leopard: These magnificent creatures excel at surviving in extremely challenging environments, adapted to the frigid peaks of the Himalayas; However, poaching & habitat loss are putting this ghostly cat at risk. **IV. Why Animals Go Extinct or**

Endangered A. Habitat Loss: Habitat loss means the destruction or degradation of an animal's natural home. Cutting down forests, draining wetlands, and building cities all contribute to this calamitous destruction. B. Climate Change: Our planet is warming up, causing changes in weather patterns that severely impact animal habitats and food sources. Rising sea levels also threaten coastal ecosystems and their inhabitants. C. Pollution: Pollution, from plastic waste to industrial runoff, contaminates air, water, and soil, harming animals directly and their habitats. This contamination can lead to genetic abnormalities, diseases, and even death. D. Poaching and Illegal Wildlife Trade: The illegal hunting and trading of endangered animals for their body parts is a major driver of extinction. This illicit trade is a despicable and dangerous operation that puts tremendous numbers of animals at risk every year. Driven by unquenchable demand for ivory, rhino horn, and other animal products. E. Invasive Species: An invasive species is a non-native species that outcompetes native animals for resources, thereby disrupting the balance of the ecosystem. These species often lack natural predators in new environments, enabling exponential proliferation. **V. What Can We Do to Help?** A. Conservation Efforts: Conservationists work tirelessly to protect endangered

species through various methods, including habitat restoration, anti-poaching measures, and captive breeding programs. B. Supporting Wildlife Organizations: Kids can help by supporting organizations dedicated to wildlife conservation. Even small donations can make a significant difference. C. Responsible Tourism: When traveling, it's crucial to choose eco-friendly destinations and tour operators who prioritize animal welfare. Avoiding interactions that exploit animals is essential. D. Spreading Awareness: Talk to your friends and family about the importance of protecting endangered animals; The more people understand the problem, the more likely we are to find solutions for these problems. Educational outreach could involve school projects, presentations, or simply educating people about the issues in your community. 10 Catchy

What's the Difference? Extinct vs. Endangered

Before we dive into the stories of these incredible animals, let's clear up what "extinct" and "endangered" mean. It's like a special code for how much danger an animal is in.

Extinct: Gone Forever!

When we say an animal is **extinct**, it means there are absolutely no more of them left anywhere on Earth. They've all disappeared. Imagine a favorite toy that you can never find again, no matter how hard you look – that's kind of like an extinct animal. The most famous example is probably the mighty dinosaur! They lived millions of years ago, and now they only exist in books, movies, and fossils. It's a bit spooky to think about, but it's also important to learn from it.

Other animals that are now extinct include the Dodo bird, a funny-looking bird that used to live on an island, and the Woolly Mammoth, a giant hairy elephant that roamed during the Ice Age. It makes us wonder, what other amazing creatures might we never get to see?

Endangered: In Danger of Becoming Extinct

Now, **endangered** animals are different. They are still alive, but there are very, very few of them left. They are like a flickering candle flame that could go out at any moment. Scientists are really worried about these animals because if we don't help them, they could become extinct too.

The number of endangered species is growing, and it's a serious problem. It's not just about losing a cool animal; it's about losing a part of our amazing planet's **biodiversity** – that's all the different kinds of life on Earth. Think of it like a giant puzzle;

every animal is a unique piece, and when a piece goes missing, the whole picture isn't complete.

Why Do Animals Become Endangered or Extinct?

It's not like animals just decide to disappear! Usually, it's because of things that happen in their homes, which we call **habitats**. Sometimes, it's also because of things humans do, and that's where we can really make a difference.

Habitat Loss: No Place to Live!

Imagine if your house was knocked down and you had nowhere to sleep or play. That's what happens to many animals when their **habitats are destroyed**. This can happen for many reasons:

1. **Deforestation:** When forests are cut down for wood, to build farms, or to make space for cities, animals lose their homes, food, and places to hide. Think about monkeys swinging through trees or bears finding berries in the woods – if the trees are gone, so are they.
2. **Pollution:** When rivers, oceans, and the land get dirty with trash and chemicals, it harms animals. For example, plastic in the ocean can choke sea turtles, and dirty water can make fish sick.
3. **Urban Sprawl:** As towns and cities grow bigger, they can take over natural areas where animals used to live.

Hunting and Poaching: Dangerous for Animals

Sadly, some animals are hunted by humans. Sometimes, it's for food, but other times it's for their **valuable parts**, like ivory from elephant tusks or rhino horns. This illegal hunting is called **poaching**, and it's a major reason why animals like rhinos and tigers are so endangered. It's really unfair and dangerous for these creatures.

Climate Change: The Planet is Changing

Our planet is getting warmer, and this **climate change** affects animals in many ways. Polar bears, for example, need ice to hunt seals. As the ice melts, they have a harder time finding food. Some animals might not be able to adapt to the changing temperatures, or their food sources might disappear.

Invasive Species: Unwanted Guests

Sometimes, when new plants or animals are introduced to an area where they don't belong (often by humans!), they can cause problems. These are called **invasive species**. They might eat all the food that native animals need, or they might carry diseases that hurt local wildlife.

Incredible Endangered Animals We

Need to Save

Let's meet some of the amazing animals that are currently on the **endangered species list**. These are not just pictures in a book; they are living, breathing creatures that need our help right now!

The Gentle Giant: The Giant Panda

Who doesn't love a panda? With their black and white markings and their love for bamboo, pandas are incredibly cute. But these bears are endangered because their bamboo forests in China are shrinking. They need a lot of bamboo to survive, so losing their homes means losing their food.

Keywords: giant panda, panda habitat, bamboo, save pandas.

The Striped Hunter: The Tiger

Tigers are magnificent big cats, the largest in the cat family! Their beautiful stripes help them camouflage in the forest. Sadly, tigers are endangered due to poaching for their skins and bones, and because their forest homes are being destroyed for farming and development. There are different kinds of tigers, and some are more endangered than others.

Keywords: tiger, Bengal tiger, Siberian tiger, tiger conservation, big cats.

The Ocean's Gentle Giant: The Blue Whale

The blue whale is the biggest animal on Earth – even bigger than the dinosaurs were! These enormous creatures live in the ocean and eat tiny shrimp-like animals called krill. They were hunted almost to extinction for their blubber and oil in the past. While their numbers are slowly increasing, they are still considered endangered and face threats from ship strikes and pollution.

Keywords: blue whale, ocean animals, marine life, whale conservation.

The Armored Survivor: The Rhinoceros

Rhinos are incredible prehistoric-looking animals with thick, tough skin and amazing horns. Sadly, they are critically endangered, mostly because poachers hunt them for their horns, which some people wrongly believe have medicinal properties. There are different rhino species, like the Black Rhino and the White Rhino, and all are in trouble.

Keywords: rhinoceros, rhino horn, black rhino, white rhino, save rhinos.

The Primate Pal: The Orangutan

Orangutans, which means "person of the forest" in Malay, are amazing apes found in the rainforests of Borneo and Sumatra. They are super smart and have long, reddish-brown hair. Their biggest threat is the destruction of their rainforest homes for

palm oil plantations. This is a huge problem for these tree-dwelling creatures.

Keywords: orangutan, rainforest animals, Borneo, Sumatra, palm oil, save orangutans.

The Diving Wonder: The Sea Turtle

Sea turtles have been swimming in our oceans for millions of years! They are incredible travelers, but they face many dangers. Pollution, especially plastic in the ocean, can harm them. Fishing nets can accidentally catch them, and their nesting beaches are being lost to development. Different sea turtle species, like the Green Sea Turtle and the Hawksbill Turtle, are all endangered.

Keywords: sea turtle, marine conservation, ocean pollution, save sea turtles.

Extinct Animals: A Look Back

While we focus on saving animals today, it's also interesting and important to remember the animals that are gone forever. Learning about them helps us understand what we might lose if we don't act.

The Quirky Dodo Bird

The Dodo was a plump, flightless bird that lived on the island of Mauritius. It wasn't afraid of humans because there were no

predators on the island. Unfortunately, when ships arrived, sailors and the animals they brought with them (like rats and pigs) hunted the Dodos and destroyed their eggs. They disappeared by the late 17th century.

Keywords: dodo bird, extinct birds, Mauritius.

The Woolly Giant: The Woolly Mammoth

Imagine a massive elephant covered in thick, shaggy fur! That was the Woolly Mammoth, which lived during the Ice Age. They were hunted by early humans for food and fur. They also faced changes in their habitat as the climate warmed and their grassy plains disappeared. They went extinct around 4,000 years ago.

Keywords: woolly mammoth, ice age animals, extinct mammals.

How Can Kids Become Wildlife Heroes?

Feeling a bit sad about these animals? Don't worry, because YOU can be a part of the solution! Even kids can do amazing things to help protect endangered and extinct-threatened animals. Here are some ideas:

Learn and Share!

The more you know, the more you can help! Read books, watch documentaries, and talk to your family and friends about

endangered animals. When you share what you learn, you can inspire others to care too!

Reduce, Reuse, Recycle!

This is super important for protecting animal habitats. When we reduce the amount of trash we create, reuse things, and recycle, we help keep our planet clean. Less pollution means healthier homes for animals.

Make Eco-Friendly Choices!

Ask your parents about making choices that are good for the planet. This could mean buying products made from sustainable sources, reducing energy use at home, or choosing toys made from recycled materials.

Support Conservation Organizations!

Many wonderful groups work hard to protect animals. You can help by donating a small amount of your allowance (with your parents' permission!), participating in fundraisers, or even just spreading the word about their work.

Be Kind to Nature!

When you're outdoors, remember to respect the environment. Don't litter, stay on trails, and observe wildlife from a distance without disturbing them. Even small actions can make a big difference.

The Future of Animals is in Our Hands

Learning about extinct and endangered animals can be a bit scary, but it's also incredibly important. It reminds us that our planet is a precious place filled with amazing creatures, and they all depend on us. By understanding the challenges they face and by taking action, no matter how small, we can all play a part in ensuring that these magnificent animals continue to roam, fly, and swim for generations to come. Let's be the best animal protectors we can be!

Understanding Extinct and Endangered Animals: A Journey for Young Explorers

Children have a natural curiosity about the animals that once roamed the Earth and those fighting to survive today. Learning about extinct and endangered species offers a powerful way to connect with nature, understand biodiversity, and inspire a lifelong commitment to conservation. These animals, both lost to time and still struggling, teach us valuable lessons about ecosystems, human impact, and the importance of protecting life in all its forms.

The Story of Extinction: What It Means When Animals Disappear

Extinction occurs when a species no longer exists—when there are no living members left on the planet. This is a sobering reality shaped by natural forces over millions of years, but today, human activity has dramatically accelerated the rate of extinction. Dinosaurs, which ruled Earth for over 160 million years, vanished around 66 million years ago, likely due to a massive asteroid impact and climate upheaval. But many species today face similar fates not from cosmic events, but from habitat loss, pollution, climate change, and poaching. The dodo bird, once native to Mauritius, disappeared just over 300 years after humans arrived, victims of introduced predators and habitat destruction. Learning about these stories helps kids grasp how fragile life can be and why every species matters.

Endangered Animals: Species in Peril, Still Fighting for Survival

When animals are classified as endangered, it means their population has dwindled sharply and they face a very high risk of extinction in the wild. The International Union for Conservation of Nature, or IUCN, tracks these species using a Red List that guides global conservation efforts. Among the most well-known endangered animals are the Amur leopard, with fewer than 100 remaining in the wild, and the northern white rhinoceros, now functionally extinct due to poaching and reproductive

challenges. Other vulnerable species include sea turtles, whose nesting sites are threatened by coastal development, and the mountain gorilla, surviving only in remote parts of Central Africa. These animals remind us that even beautiful, resilient creatures can teeter on the edge—and that human action can still turn the tide.

For children, engaging with these stories fosters empathy and responsibility. Understanding why certain animals are endangered helps build a deeper appreciation for nature's interconnectedness. When kids learn that deforestation, plastic pollution, and climate change directly impact wildlife, they begin to see themselves as part of the solution. This awareness sparks curiosity in science, environmental stewardship, and compassion for all living beings.

Real-World Impact: How Kids Can Help Protect Endangered Species

Young people are not just passive observers—they can become active protectors of endangered animals. Simple actions like reducing plastic use, supporting sustainable products, and spreading awareness through art, writing, or school projects make a meaningful difference. Participating in local conservation programs, such as beach cleanups or tree planting, connects children directly with wildlife habitats. Educators and parents can guide kids to explore citizen science projects, where they contribute real data to tracking endangered species. These experiences turn knowledge into purpose, empowering children

to believe they can protect the natural world.

Conservation is not a distant effort—it is a shared journey. When kids learn about extinct and endangered animals, they gain not only knowledge but also hope. By understanding the past and present, they become informed advocates for the future, ready to inspire change and preserve the rich tapestry of life that surrounds us.

Extinct and Endangered Animals for Kids: Understanding Our Planet's Precious Wildlife

Imagine a world without the gentle giant, the elephant, or the playful panda. For many children, these magnificent creatures are staples of their storybooks and dreams. However, the reality is that a growing number of animals are teetering on the brink of disappearing forever, while others have already vanished. This article explores the crucial topic of extinct and endangered animals for kids, explaining what these terms mean, why animals become endangered, and most importantly, what young conservationists can do to help.

What Does "Extinct" Mean?

When we talk about **extinct animals**, we're referring to species that no longer exist anywhere on Earth. Think of them as creatures from the past, whose unique genes and roles in their ecosystems are gone for good. This is a permanent loss, and sadly, it's a process that has happened throughout Earth's history, often due to major environmental changes or natural events. However, in recent times, human activities have significantly accelerated the rate of extinction. For kids, understanding extinction is a somber but vital lesson about the fragility of life.

Famous Examples of Extinct Animals

Several fascinating creatures have sadly joined the ranks of the extinct. The most famous is perhaps the **dodo bird**, a flightless bird that lived on the island of Mauritius. It was hunted to extinction by sailors and the animals they brought with them, like rats and pigs, in the 17th century. Another well-known example is the **woolly mammoth**, a giant, shaggy relative of the elephant that roamed the Earth during the Ice Age. While their extinction is thought to be a combination of climate change and human hunting, their iconic image still sparks wonder.

For children learning about these creatures, it's like reading about a character who has been removed from a story permanently. It highlights the importance of appreciating and protecting the animals we still have. Learning about **ancient**

animals can also be a gateway to understanding evolution and the incredible diversity of life that has existed on our planet.

What Does "Endangered" Mean?

While extinction is forever, **endangered animals** are those that are at a very high risk of becoming extinct in the near future.

They are still alive, but their populations have dwindled so drastically that their survival is seriously threatened. This is where the focus for conservation efforts often lies – on protecting these vulnerable species before they disappear completely.

Understanding the concept of endangered species is a crucial step in developing empathy and a sense of responsibility towards the natural world for young people.

Classifying Endangered Species

Organizations like the International Union for Conservation of Nature (IUCN) categorize the threat level of species. Animals can be listed as:

1. **Vulnerable:** At high risk of endangerment in the wild.
2. **Endangered:** At very high risk of extinction in the wild.
3. **Critically Endangered:** At an extremely high risk of extinction in the wild.

This classification system helps scientists and conservationists prioritize their efforts and understand the urgency of the situation for different species.

Why Are Animals Becoming Endangered?

The reasons behind a species becoming endangered are often complex, but they usually boil down to threats that disrupt their natural habitats and ways of life. For kids, understanding these causes is key to grasping why conservation is so important. Here are some of the main culprits:

Habitat Loss and Degradation

This is the biggest driver of endangerment. When forests are cut down for farms or buildings, wetlands are drained, or oceans are polluted, animals lose the places they need to live, find food, and raise their young. Imagine your home being destroyed – that's what happens to these animals. This is a direct result of **human impact on wildlife**. Deforestation, urbanization, and agricultural expansion all contribute to shrinking habitats.

Poaching and Illegal Wildlife Trade

Sadly, some animals are hunted illegally for their body parts, such as ivory from elephants, rhino horns, or skins from big cats. This illegal trade can decimate populations very quickly. For children, this concept can be particularly disturbing, as it involves the deliberate harm of animals for profit. Understanding the dangers of **wildlife trafficking** is an important aspect of conservation education.

Climate Change

As the Earth's temperature rises, it affects weather patterns, sea levels, and ecosystems. For example, polar bears rely on sea ice to hunt seals, and as the ice melts, their hunting grounds disappear. Coral reefs are also bleaching and dying due to warmer ocean temperatures. This global phenomenon is a significant threat to many species, including numerous **marine animals** and **Arctic animals**.

Pollution

Pollution from plastics, chemicals, and other waste can harm animals in various ways. Birds can get tangled in plastic, fish can ingest microplastics, and chemicals can poison water sources. This invisible threat affects a wide range of creatures, from small insects to large mammals.

Invasive Species

When new species are introduced to an environment where they don't naturally belong, they can outcompete native animals for food and resources or even prey on them. This can disrupt the delicate balance of an ecosystem.

Iconic Endangered Animals for Kids to

Learn About

There are many amazing endangered animals that can capture a child's imagination and inspire them to learn more. Here are a few prominent examples:

The Majestic Tiger

The tiger, with its striking stripes and powerful presence, is a symbol of wild beauty. Sadly, all tiger subspecies are endangered due to poaching and habitat loss. Learning about **tigers in India**, where many conservation efforts are focused, can be a fascinating topic.

The Gentle Giant: The Panda

The adorable giant panda, with its distinctive black and white fur, is an icon of conservation. While their numbers have been slowly increasing due to dedicated efforts, they remain vulnerable. Their diet of bamboo is also a factor in their habitat needs. Studying the **conservation of pandas** is a great example of successful (though ongoing) conservation.

The Playful Orangutan

These intelligent primates, found in the rainforests of Borneo and Sumatra, are facing severe threats from the destruction of their forest homes for palm oil plantations. Understanding the link between everyday products and the plight of these **rainforest**

animals is crucial.

The Ocean's Gentle Giants: Whales and Dolphins

Many species of whales and dolphins are endangered due to pollution, overfishing, and entanglement in fishing gear. Learning about these **sea creatures** can highlight the importance of protecting our oceans.

The Unique Rhinoceros

Rhinos are heavily targeted by poachers for their horns, leading to critically endangered status for several species. Efforts to combat poaching and protect their habitats are ongoing.

What Can Kids Do to Help Endangered Animals?

It's easy to feel helpless when learning about endangered animals, but children can actually make a big difference! Empowering kids with knowledge and actionable steps is key to fostering a generation of conservationists. Here are some ways young people can become wildlife heroes:

Learn and Share Knowledge

The first step to helping is understanding. Encourage children to read books, watch documentaries, and visit websites about

endangered animals. Then, they can share what they learn with friends and family, raising awareness about the importance of protecting wildlife.

Reduce, Reuse, Recycle

This is a fundamental principle of environmentalism. By reducing waste, reusing items, and recycling, children can help decrease pollution and conserve resources that are essential for animal habitats. Less trash means less harm to animals, especially **plastic pollution affecting wildlife**.

Make Sustainable Choices

When shopping with parents, encourage them to choose products that are sustainably sourced and don't contribute to habitat destruction, like palm oil-free products. Looking for the FSC certification for wood and paper products is also a good practice.

Conserve Water and Energy

Saving water and electricity helps reduce the demand for energy production, which can have environmental impacts. Turning off lights when leaving a room and taking shorter showers are simple yet effective actions.

Support Conservation Organizations

Even small donations can help. Children can organize bake sales, car washes, or other fundraisers to support reputable wildlife conservation charities that work to protect endangered species and their habitats. Learning about organizations that focus on specific **animal conservation projects** can be inspiring.

Be Kind to Nature

This means respecting local wildlife, not disturbing animals in their natural habitats, and picking up litter when visiting parks or natural areas. Teaching children about responsible tourism when visiting natural areas is also important.

The Future of Endangered Animals

The fight to save endangered animals is an ongoing one. It requires global cooperation, scientific research, and the dedication of individuals from all walks of life. For kids, their involvement, no matter how small, contributes to a larger movement. By understanding the plight of extinct and endangered animals, children can develop a profound appreciation for the natural world and a commitment to protecting it for future generations. The stories of these animals are not just tales of loss, but also of hope and the power of collective action. Let's ensure that the roar of the tiger, the call of the whale, and the gentle rustle of the orangutan in the trees continue to be heard for centuries to come.

Questions & Answers About extinct and endangered animals for kids

No	Question	Answer
----	----------	--------

1	What's the difference between an animal being 'extinct' and 'endangered'?	Imagine a dinosaur – it's extinct because there are NONE left on Earth, not even one! An endangered animal, like a giant panda, is super close to becoming extinct because there are very few of them left. We still have a chance to save them!
2	Why do animals become endangered in the first place?	Lots of reasons! Sometimes their homes (habitats) get destroyed by people building things or farming. Other times, they are hunted too much, or they can't find enough food. Sometimes, it's because of changes in the weather that make it hard for them to survive.
3	Can you name an animal that used to roam the Earth but isn't here anymore?	Sure! The most famous one is probably the Tyrannosaurus Rex, or T-Rex! That giant, fierce dinosaur lived millions of years ago and is now extinct. We only know about them from their amazing fossils!
4	Are there any cool animals that are endangered right now that kids might know?	Definitely! Think about majestic tigers, playful pandas, powerful rhinos, and even the colorful blue whale. These incredible creatures are all endangered and need our help to survive.
5	What happens if all the animals of one kind disappear forever?	If an animal becomes extinct, it's gone forever, and that's really sad. Every animal plays an important role in nature. If one disappears, it can affect other plants and animals, making it harder for them to survive too. It's like a big puzzle where every piece is needed!

6	How can kids help endangered animals even if they're small?	You can be a superhero for animals! Learn about them and tell others why they are important. You can also help by recycling, saving water and electricity, and not littering. These small actions protect the homes of many animals!
7	What's a dodo bird, and why is it extinct?	The dodo was a funny-looking, flightless bird that lived on an island called Mauritius. Sadly, when people arrived there, they hunted the dodos, and the birds' eggs were eaten by new animals that came with the ships. The dodo couldn't escape and eventually disappeared forever.
8	Are there any animals that were once endangered but are doing better now?	Yes! The bald eagle in North America is a great example. Thanks to conservation efforts, like protecting their habitats and reducing pollution, their numbers have grown, and they are no longer endangered! It shows that when we work together, we can make a difference.
9	What is a habitat, and why is it so important for animals?	A habitat is like an animal's home - it's where they find food, shelter, and a place to raise their families. If an animal's habitat is destroyed or changed, it can be very hard for them to survive and find what they need to live. Protecting habitats helps protect the animals that live there!
