What Makes the Phonak Virto V90 So Special?

Before we dive into the specifics of operation, let's briefly touch upon what sets the Virto V90 apart. Phonak is renowned for its innovation, and the V90 line exemplifies this. These hearing aids are built with advanced technology to deliver exceptional sound quality, speech understanding in challenging environments, and unparalleled comfort. The "V" in Virto V90 often refers to the underlying platform, which is designed for discreet wear and superior performance. Whether you're navigating a noisy restaurant, enjoying a quiet conversation, or simply appreciating the subtle sounds of nature, the Virto V90 is engineered to adapt and enhance your hearing experience.

Getting Started: Unboxing and First Steps

So, you have your new Phonak Virto V90 hearing aids! The initial setup is usually straightforward, but it's worth a quick refresher.

What's Inside the Box?

Typically, your Phonak Virto V90 package will include: * Your custom-molded Virto V90 hearing aids (one for each ear, unless otherwise specified). * A charging case or battery compartment, depending on your model's power source. * A cleaning kit (brushes, wax guards). * User instructions and warranty information. * Potentially, any necessary accessories

like domes or retention locks.

Powering On and Off Your Virto V90

The method for powering your Virto V90 on and off depends on whether you have a rechargeable model or one that uses disposable batteries. * **Disposable Batteries:** * For battery-operated models, you'll usually find a small door on the hearing aid. To turn them on, simply close the battery door. To turn them off, open the battery door. Always ensure the battery is inserted correctly, with the flat side down. *

Rechargeable Models: * If you have a rechargeable Virto V90, the process is even simpler. To turn them off, place them in their charging case and close the lid. To turn them on, simply remove them from the charging case. They will typically power on automatically.

Inserting and Removing Your Virto V90

Proper insertion is crucial for both comfort and optimal sound delivery. Your audiologist will have demonstrated this, but here's a reminder: 1. **Identify Left and Right:** Hearing aids are typically marked with an "L" for left and "R" for right. 2. **Grasp Gently:** Hold the hearing aid by its body, not by the earwax guard or any tubing. 3. **Angle and Insert:** For custom-molded aids, gently angle the shell into your ear canal, following the natural shape of your ear. For BTE (Behind-the-Ear) models with an earmold or dome, ensure the earmold or dome is snug but comfortable in your ear canal. 4. **Check for Fit:** The hearing aid should feel secure without causing pain. There should be no whistling or feedback (a high-pitched squeal), which might indicate a loose fit or a

blockage. Removal is the reverse: gently grasp the hearing aid and pull it out.

Understanding Your Phonak Virto V90 Features

The true magic of the Virto V90 lies in its sophisticated features, designed to adapt to your unique hearing needs.

Automatic Program Selection (AutoSense OS™)

One of the most revolutionary aspects of the Phonak Virto V90 is its AutoSense OS™ operating system. This intelligent system automatically analyzes your listening environment in real-time and seamlessly adjusts the hearing aid settings to provide the optimal sound experience. You don't need to manually change programs in most situations! AutoSense OS™ recognizes various sound environments like: **Quiet:** Enhances speech clarity and natural sound. **Speech in Noise:** Focuses on conversations, suppressing background noise effectively. **Music:** Optimizes sound reproduction for a richer, more immersive musical experience. **Comfort in Noise:** Reduces the impact of loud, sudden noises without distorting speech. Your audiologist will have configured these programs for you, but understanding that your hearing aids are actively working to optimize your listening is empowering.

Directionality: Pinpointing Sound

The Virto V90 employs advanced directionality features. This means your hearing aids can intelligently focus on sounds

coming from specific directions, helping you to pick out conversations in noisy environments. Some models might offer adaptive directionality, where the focus shifts automatically as you turn your head or as the sound source changes.

Tinnitus Management (Optional Feature)** If you experience tinnitus (ringing in the ears), some Phonak Virto V90 models can be equipped with a tinnitus masker. This feature generates a soothing sound that can help to distract from or mask the tinnitus. This is a feature that requires specific programming by your audiologist.

Connectivity: Bluetooth® and More** Depending on your specific Virto V90 model and its configuration, you may have access to advanced connectivity features. This can include: * ****Direct Streaming:**** Stream audio directly from your smartphone, tablet, or TV to your hearing aids. This is incredibly useful for phone calls, listening to music, podcasts, or watching videos without needing to remove your hearing aids or rely on a separate streamer. * ****Roger Technology**

Compatibility:** Phonak's Roger system (e.g., Roger Pen, Roger Select) offers unparalleled speech-in-noise performance by transmitting sound directly to your hearing aids. If you frequently find yourself in challenging listening situations, ask your audiologist about Roger compatibility. ****Note:**** The availability of Bluetooth streaming and Roger compatibility depends

on the specific model and technology level within the Virto V90 family (e.g., V90, V70, V50, V30). Always confirm the features with your audiologist.

Daily Care and Maintenance for Longevity

Proper care is essential to ensure your Phonak Virto V90 hearing aids function optimally for years to come.

Cleaning Your Virto V90

Regular cleaning prevents wax and debris from accumulating and affecting performance. * **Daily: Use a soft, dry brush to gently remove any visible earwax from the hearing aid casing, microphone openings, and the receiver/earmold. * **Weekly (or as needed):** * **Earmolds/Domes:** If your hearing aids have removable domes or custom earmolds, detach them and clean them with a soft brush and mild soap and water. Rinse thoroughly and ensure they are completely dry before reattaching. * **Wax Guards:** Many Virto V90 models have replaceable wax guards. Your audiologist will show you how to change these. If you notice reduced sound or whistling, it might be time to change the wax guard. Use the provided tool to remove the old one and insert a new one carefully.**

Drying Your Virto V90

Moisture can damage delicate electronic components. *

****Charging Case:** For rechargeable models, simply place them in the charging case. Many advanced charging cases also have a drying function. ***

****Disposable Battery Models:** If you live in a humid climate or sweat frequently, consider using a dedicated hearing aid dehumidifier (a small container with silica beads). This will absorb excess moisture.**

Storing Your Virto V90

When not in use, store your hearing aids in their charging case or a designated safe place, away from extreme temperatures, direct sunlight, and moisture.

Troubleshooting Common Issues

Even with the best technology, you might encounter minor hiccups. Here are some common issues and their solutions:

No Sound or Reduced Volume

*** **Check Battery:** Ensure batteries are new and inserted correctly (for disposable models) or that the hearing aids are fully charged (for rechargeable models). * **Check for Blockages:** Is the earwax guard clogged? Is there debris in the receiver/earmold? Clean as described above. * **Volume Control:** Is the volume turned down too low? If you have volume control**

buttons or a remote/app, check the settings. *

****Program Selection:** Are you in a program that might have lower volume for specific environments?**

AutoSense OS™ usually handles this, but if you've manually changed programs, ensure you're in the correct one. * **Loose Fit: For custom molds or domes, ensure they are seated correctly in your ear.**

Whistling or Feedback (High-Pitched Squeal) This is often caused by: * **Loose Fit:** The hearing aid isn't sealing properly in your ear canal. * **Low Battery:** Sometimes, low batteries can cause feedback. ***

****Earwax Buildup:** Excess earwax can create a blockage, leading to feedback. * **Volume Too High:** The volume might be set too high for the level of amplification needed. * **Cracked Earmold/Dome:** If your earmold or dome is damaged, it won't seal properly. If feedback persists, contact your audiologist. They can check the fit, clean the receiver, or adjust the amplification.**

Intermittent Sound or Static

*** **Battery Issues:** Try a fresh battery or ensure a full charge. * **Moisture:** Ensure the hearing aids are dry.**

*** **Connectivity Issues:** If you're streaming, check your Bluetooth connection and the source device. ***

****Damage:** If the hearing aid has been dropped or exposed to moisture, it may be damaged.**

My Hearing Aids Aren't Connecting to My Phone

(Bluetooth) * **Bluetooth Enabled:**** Ensure

Bluetooth is turned on on both your hearing aids (they usually are when removed from the charger) and your phone. ****Paired Device:**** Your hearing aids need to be paired with your phone. This is usually a one-time process done with your audiologist. If they've become

unpaired, you may need to go through the pairing process again. ****Restart Devices:**** Sometimes, simply restarting your phone and your hearing aids (by placing them in and removing them from the charger) can resolve connection issues. ****App Check:**** If you use the Phonak app, check its connection status. ###

Exploring the Phonak App (if applicable) Many modern hearing aids, including the Virto V90, are compatible with a smartphone app (e.g., the Phonak Target™ app or a dedicated streaming app). This app can offer a wealth of control and information: ****Volume Adjustment:****

Fine-tune the volume for each ear. ****Program**

Selection:** Manually switch between different hearing programs (e.g., for music, for speech). ****Sound**

Focus:** Some apps allow you to adjust directionality to focus on specific sounds. ****Battery Status:**** Check the remaining battery life of your hearing aids. ****Find My**

Hearing Aids:** Locate misplaced devices. Your audiologist will guide you on which app to download and how to set it up. Familiarizing yourself with the app can significantly enhance your control over your hearing experience. ### **When to Contact Your Audiologist**

While this guide covers many common aspects, your audiologist remains your most valuable resource. You should contact them if:

- * You experience persistent pain or discomfort.**
- * You notice significant changes in your hearing or the hearing aid's performance.**
- * You're struggling with feedback that you can't resolve.**
- * Your hearing aids are physically damaged.**
- * You want to explore additional features or accessories.**
- * You need assistance with app setup or troubleshooting.**
- * You require new earmolds, domes, or wax guards.**

The Importance of Regular Audiology Appointments
