Key Functionalities of Hyperion

Planning at UCSF

While the specific configuration of Hyperion Planning at UCSF might be tailored to their unique needs, its core functionalities generally revolve around several key areas:

1. Budgeting and Planning Process Management

This is the heart of Hyperion Planning. It allows UCSF to define its budgeting calendar, set deadlines, and manage the workflow of budget submissions and approvals. * **Top-Down and Bottom-Up Planning:** The system supports both approaches. Senior leadership can set strategic financial targets (top-down), while individual departments can develop detailed operational budgets (bottom-up). Hyperion Planning then facilitates the reconciliation of these different perspectives. * **Scenario Modeling:** UCSF can create multiple financial scenarios within Hyperion Planning – for instance, a baseline budget, an optimistic scenario, and a pessimistic scenario. This allows them to assess the potential impact of different economic conditions or strategic decisions. * **Workflow and Approvals:** The application provides a structured workflow for budget submission, review, and approval. This ensures that budgets are properly vetted and authorized before being finalized. Automated notifications and task assignments keep the process moving efficiently.

2. Financial Data Integration and Management

Bringing together data from various sources is a monumental task for any large university. Hyperion Planning, often integrated with UCSF's core financial systems (like PeopleSoft), simplifies this. * **Data Load and Transformation:** Data from UCSF's General Ledger, HR systems, and other relevant databases can be loaded into Hyperion Planning. The tool often includes capabilities for data transformation and validation to ensure accuracy. * **Hierarchical Structures:** UCSF's organizational structure, chart of accounts, and other dimensions (like funding sources, projects, or grants) are represented in Hyperion Planning through multi-dimensional cubes. This allows for granular analysis and reporting at various levels. * **Master Data Management:** Ensuring consistency in financial data across the university is critical. Hyperion Planning, when implemented effectively, supports master data management principles, ensuring that entities like departments, accounts, and funds are defined consistently.

3. Reporting and Analytics

The ability to extract meaningful insights from financial data is crucial for effective decision-making. Hyperion Planning offers robust reporting tools. * **Customizable Reports:** Users can create a wide array of financial reports tailored to specific needs. This can include P&L statements, budget vs. actuals, variance analysis, and departmental spending summaries. * **Dashboards and Scorecards:** Visual dashboards provide a high-level overview of key financial metrics. This allows UCSF leadership and the Controller's Office to

quickly assess performance against targets and identify areas requiring attention. * **Ad-hoc Analysis:** Hyperion Planning allows users to perform ad-hoc analysis, drilling down into data to explore specific trends or anomalies. This empowers finance professionals to answer complex questions on the fly. * **Account Reconciliations (Often integrated with Oracle ARCS):** While Hyperion Planning itself is primarily for planning and budgeting, it often works in conjunction with other EPM modules for functions like account reconciliations, ensuring the integrity of the financial data that feeds into planning.

4. Forecasting and Rolling Forecasts

The dynamic nature of university finances necessitates robust forecasting capabilities. * **Predictive Analytics:** Hyperion Planning can leverage historical data and statistical models to generate forecasts. This moves beyond simple extrapolation to more sophisticated predictive capabilities. * **Rolling Forecasts:** Instead of just an annual budget, UCSF can implement rolling forecasts – continuously updated plans that look forward over a set period (e.g., the next 12-18 months). This provides a more agile and responsive approach to financial management. * **Driver-Based Planning:** For certain areas, like salary expenses or research project costs, planning can be driven by underlying operational factors or "drivers." Hyperion Planning can model these relationships to create more dynamic and accurate forecasts.

Benefits of Hyperion Planning for

UCSF Controller's Office

The adoption and effective utilization of Hyperion Planning by the UCSF Controller's Office bring a multitude of benefits that impact the entire university:

- * **Improved Accuracy and Reduced Errors:** By automating many manual processes and providing a centralized data repository, Hyperion Planning significantly reduces the risk of human error and ensures greater accuracy in budgets and forecasts.

The implementation of Hyperion Planning by the UCSF Controller's Office is not merely a technological upgrade; it's a strategic imperative. Its presence enables the Controller's Office to move beyond transactional accounting and become a more strategic partner to the university's leadership and various schools and departments.

Enhancing Financial Agility and Responsiveness

In the dynamic landscape of higher education and healthcare, UCSF needs to be agile. Changes in government funding, research breakthroughs leading to new initiatives, or shifts in patient care demands require swift financial adjustments. Hyperion Planning allows for:

1. **Faster Budget Cycles:** Automating many manual tasks in the budgeting process significantly reduces the time it takes to develop and approve budgets, enabling quicker responses to new opportunities or challenges.
2. **Real-time Visibility:** With integrated data, the Controller's Office can offer more up-to-date financial insights, allowing for more informed decision-making throughout the year, not just during the

annual budget cycle.

3. **Dynamic Forecasting:** Moving from static annual budgets to rolling forecasts provides a more realistic and forward-looking financial picture.

Improving Accuracy and Reducing Risk

The sheer volume and complexity of financial data at UCSF make manual processes prone to errors. Hyperion Planning, with its structured data inputs, business rules, and audit trails, significantly enhances accuracy and reduces the risk of misstatement. This includes:

1. **Eliminating Spreadsheets:** The notorious "spreadsheet chaos" that plagues many organizations is a major source of errors. Hyperion Planning provides a single source of truth for financial planning data, replacing disparate spreadsheets.
2. **Enforcing Business Rules:** The system can be configured to enforce specific financial policies and calculation rules, ensuring consistency and compliance.
3. **Auditability:** Hyperion Planning provides robust audit trails, documenting all changes made to financial plans, which is critical for internal and external audits.

UCSF's mission encompasses groundbreaking research, world-class patient care, and educating future leaders. Effectively allocating its substantial financial resources to support these diverse and often competing priorities is crucial. Hyperion Planning aids in this by:

1. **Detailed Cost Tracking:** Enabling the Controller's Office to track

costs at a granular level across departments, projects, and funding sources.

2. **Performance Measurement:** Facilitating the comparison of actual financial performance against planned budgets, identifying areas of over/under-spending and enabling performance analysis.
3. **Investment Justification:** Providing a platform for departments to build business cases for new investments, clearly outlining financial requirements and projected returns or benefits.

Challenges and Considerations in Hyperion Planning Implementation at UCSF

While Hyperion Planning offers immense benefits, its implementation and ongoing management within a large university setting are not without challenges. These are common considerations for any large-scale EPM deployment:

Data Integration and Management

UCSF operates a complex ecosystem of financial systems. Integrating Hyperion Planning seamlessly with these systems (such as PeopleSoft Financials, various grants management systems, and potentially others) is a significant undertaking. Ensuring data quality, cleansing legacy data, and establishing robust data governance are paramount. This involves close collaboration between the Controller's Office, IT departments, and various UCSF schools and departments.

User Adoption and Training

For Hyperion Planning to be effective, users across the university, from finance professionals to departmental budget managers, must be trained and comfortable using the system. This requires a comprehensive change management strategy, including ongoing training programs, clear documentation, and readily available support. The learning curve for a sophisticated EPM tool can be steep, necessitating dedicated resources for user enablement.

System Configuration and Customization

Universities often have unique budgeting methodologies, reporting requirements, and approval hierarchies. Configuring Hyperion Planning to meet these specific needs requires deep functional and technical expertise. Over-customization can lead to system complexity, maintenance challenges, and higher upgrade costs. Finding the right balance between out-of-the-box functionality and necessary customization is key. This often involves working with experienced Oracle partners specializing in Hyperion.

Ongoing Maintenance and Upgrades

Like any enterprise software, Hyperion Planning requires ongoing maintenance, patching, and periodic upgrades to stay current with security updates and benefit from new features. UCSF's IT and finance teams must allocate resources for these activities to ensure the system remains stable, secure, and effective. Managing the upgrade cycle can be resource-intensive, particularly for older on-premises versions, though cloud-based Oracle EPM Cloud solutions offer a different approach to this.

The Future of Financial Planning at UCSF with Hyperion

The Controller's Office at UCSF, by leveraging Hyperion Planning, is laying the groundwork for a more sophisticated and strategic approach to financial management. As the university continues to grow and evolve, the capabilities provided by Hyperion Planning will become increasingly indispensable.

Leveraging Advanced Analytics and AI

UCSF's Controller's Office can explore these advanced capabilities within the Oracle EPM suite to gain deeper insights and further automate financial processes.

Cloud Migration Considerations

While UCSF may currently utilize on-premises versions of Hyperion Planning, many organizations are migrating to cloud-based EPM solutions like Oracle EPM Cloud. This shift can offer benefits such as reduced IT infrastructure management, faster access to new features, and enhanced scalability. The Controller's Office will likely evaluate cloud migration as a future strategic move.

Enhanced Collaboration and Transparency

As Hyperion Planning matures within UCSF, the focus can shift

towards further enhancing collaboration and transparency across the institution. Empowering departmental users with self-service reporting and planning capabilities, while maintaining central control, can lead to a more engaged and financially literate university community.

Conclusion

Oracle Hyperion Planning plays a pivotal role within the UCSF Controller's Office, transforming how the university approaches budgeting, forecasting, and financial planning. By providing a centralized, powerful platform, it enables greater accuracy, efficiency, and strategic agility. While challenges related to data integration, user adoption, and system maintenance are inherent in such large-scale deployments, the strategic benefits for UCSF are substantial. As UCSF continues its mission of excellence in education, research, and patient care, its investment in robust EPM solutions like Hyperion Planning is a testament to its commitment to sound financial stewardship and a future driven by informed, data-backed decisions. The ongoing evolution of EPM technologies, coupled with UCSF's strategic vision, promises an even more sophisticated and impactful financial management future.
