Evaluating Source Credibility: The Journalist's Imperative

Not all online content is created equal. As a journalist, I always emphasize the importance of source evaluation. Ask yourself:

2. **What is the publication?** Is it a reputable news outlet, an academic journal, a personal blog, or a commercial site?
3. **Is the information current?** For news and science, recency is vital.
4. **Is the information biased?** Look for objective language and consider the potential agenda of the publisher.
5. **Are there citations or references?** This indicates that the author has done their research.

Cross-referencing information from multiple reputable sources is always a good practice.

Leveraging Search Operators: Advanced Search Techniques

Search engines offer powerful tools to refine your searches:

1. **Quotation Marks (" "):** To search for an exact phrase (e.g., "climate change solutions").
2. **Minus Sign (-):** To exclude certain words (e.g., "apple -fruit" to search for the company).
3. **site: operator:** To search within a specific website (e.g., "site:nytimes.com artificial intelligence").
4. **filetype: operator:** To find specific types of files (e.g., "filetype:pdf research paper").
